

Armed Response Training

Stop The Bleed

Saturday, March 07, from 0900-1500

If you are a responsible person who carries a firearm to better protect yourself or family then you also be responsible enough to save yourself or family in the event of an extremity wound with massive bleeding. For a severe arterial bleed you will have less than 2 minutes before you lose the ability to save yourself or family. You must have the tools, knowledge, and ability to "STOP THE BLEED".

Topics covered during the course:

The use of manufactured and improvised tourniquets.

Reasons and the importance of carrying an IFAK.

Draw and shoot the firearm 1-handed.

Conduct reloads and fix all malfunctions 1-handed.

Proper use of cover.

Shoot with, communicate, and help save injured partner.

Students will need the following equipment:

Firearm, 2-3 mags, 400 rounds, strong side holster, mag pouch, eye and ear protection, chair, drinks and snacks.

To register for a course, times, and additional information contact Vince Lozano @ 799-3858 or register @www.pistolart.net
